List of Publications of I. J. Schoenberg

The numbering corresponds to the listing in the Schoenberg *Selecta* (see last item below). In particular, the unnumbered items failed to appear in that listing.

[1] I. J. Schoenberg (1929), "Über total monotone Folgen mit stetiger Belegungsfunktion", *Math. Z.* **30**, 761–767.

[2] I. J. Schoenberg (1928), "Über die asymptotische Verteilung reeller Zahlen mod 1", *Math. Z.* **28**, 171–199.

[3] I. J. Schoenberg (1930), "Sur un théorème de Steiner relatif à la quadrature des courbes roulettes", *Ann. Sci. Univ. Jassy* **16**, 6–13.

[4] I. J. Schoenberg (1930), "Über variationsvermindernde lineare Transformationen", *Math. Z.* **32**, 321–328.

[5] G. A. Bliss and I. J. Schoenberg (1931), "On separation, comparison, and oscillation theorems for self–adjoint systems of linear second order differential equations", *Amer. J. Math.* **LIII**, 781–800.

[6] I. J. Schoenberg (1931), "The minimizing properties of geodesic arcs with conjugate end points", *Ann. Math.(2)* **32**, 763–776.

[7] I. J. Schoenberg (1932), "On finite and infinite completely monotonic sequences", *Bull. Amer. Math. Soc.* **Feb.**, 72–76.

[8] I. J. Schoenberg (1932), "On finite–rowed systems of linear inequalities in infinitely many variables. I", *Trans. Amer. Math. Soc.* **34**, 594–619.

[9] I. J. Schoenberg (1932), "On finite–rowed systems of linear inequalities in infinitely many variables. II", *Trans. Amer. Math. Soc.* **35**, 452–478.

[10] A. G. Bliss and I. J. Schoenberg (1932), "On the derivation of necessary conditions for the problem of Bolza", *Bull. Amer. Math. Soc.* **Dec.**, 858–864.

[11] I. J. Schoenberg (1932), "Some applications of the calculus of variations to Riemannian geometry", *Ann. Math* **33**, 485–495.

[12] I. J. Schoenberg (1933), "Convex domains and linear combinations of continuous functions", *Bull. Amer. Math. Soc.* **April**, 273–280.

[13] T. H. Hildebrandt and I. J. Schoenberg (1933), "On linear functional operations and the moment problem for a finite interval in one or several dimensions", *Ann. Math.* **34**, 317–328.

[14] I. J. Schoenberg (1934), "A remark on the preceding note by Bochner", *Bull. Amer. Math. Soc.* **April**, 277–278.

[15] I. J. Schoenberg (1934), "Zur Abzählung der reellen Wurzeln algebraischer Gleichungen", *Math. Z.* **38**, 546–564.

[16] I. J. Schoenberg (1935), "Remarks to Maurice Fréchet's article 'Sur la définition axiomatique d'une classe d'espace distanciés vectoriellement applicable sur l'espace de Hilbert'", *Ann. Math.* **36**, 724–732.

[17] I. J. Schoenberg (1935), "On the zeros of the successive derivatives of integral functions", *Proc. Amer. Math. Soc.* **21**, 674–676.

[18] I. J. Schoenberg (1936), "On asymptotic distributions of arithmetical functions", *Trans. Amer. Math. Soc.* **39**, 315–330.

[19] I. J. Schoenberg (1936), "Extensions of theorems of Descartes and Laguerre to the complex domain", *Duke Math. J.* **2**, 84–94.

[20] I. J. Schoenberg (1936), "On certain two–point expansions of integral functions of exponential type", *Bull. Amer. Math. Soc.* **???**, 284–288.

[21] I. J. Schoenberg (1936), "On the zeros of successive derivatives of integral functions", *Trans. Amer. Math. Soc.* **40**, 12–23.

[22] I. J. Schoenberg (1937), "Regular simplices and quadratic forms", *J. London Math. Soc.* **12**, 48–55.

[23] I. J. Schoenberg (1937), "On certain metric spaces arising from Euclidean spaces by a change of metric and their imbedding in Hilbert space", *Ann. Math.* **38(4)**, 787–793.

[24] I. J. Schoenberg (1938), "On the Peano curve of Lebesgue", *Bull. Amer. Math. Soc.* **44**, 519.

[25] I. J. Schoenberg (1938), "Metric spaces and positive definite functions", *Trans. Amer. Math. Soc.* **44**, 522–536.

[26] I. J. Schoenberg (1938), "Metric spaces and completely monotone functions", *Ann. Math.* **39(4)**, 811–841.

[27] I. J. Schoenberg (1940), "On metric arcs of vanishing Menger curvature", *Ann. Math.* **41**, 715–726.

[28] J. von Neumann and I. J. Schoenberg (1941), "Fourier integrals and metric geometry", *Trans. Amer. Math. Soc.* **50**, 226–251.

[29] I. J. Schoenberg (1942), "Positive definite functions on spheres", *Duke Math. J.* **9**, 96–108.

[30] I. J. Schoenberg (1942), "On local convexity in Hilbert space", *Bull. Amer. Math. Soc.* **48**, 432–436.

[31] I. J. Schoenberg (1946), "Contributions to the problem of approximation of equidistant data by analytic functions, Part A: On the problem of smoothing or graduation, a first class of analytic approximation formulas", *Quart. Appl. Math.* **4**, 45–99.

[32] I. J. Schoenberg (1946), "Contributions to the problem of approximation of equidistant data by analytic functions, Part B: On the problem of osculatory interpolation, a second class of analytic approximation formulae", *Quart. Appl. Math.* **4**, 112–141.

[33] H. Rademacher and I. J. Schoenberg (1946), "An iteration method for calculation with Laurent series", *Quart. Appl. Math.* **IV**, 142–159.

[34] I. J. Schoenberg (1947), "On totally positive functions, Laplace integrals and entire functions of the Laguerre–Pólya–Schur type", *Proc. Nat. Acad. Sci.* **33**, 11-17.

[—] H. B. Curry and I. J. Schoenberg (1947), "On spline distributions and their limits: The Polya distribution functions", *Bull. Amer. Math. Soc.* **53**, 1114.

[35] I. J. Schoenberg (1948), "Some analytic aspects of the problem of smoothing", in *Courant Anniv. Vol.* (xxx, ed), xxx (xxx), 35??–370.

[36] I. J. Schoenberg (1948), "On variation diminishing integral operators of the convolution type", *Proc. Nat. Acad. Sci.* **34**, 164–169.

[37] I. J. Schoenberg and A. Whitney (1949), "Sur la positivité des déterminants de translations des fonctions de fréquence de Pólya avec une application a une problème d'interpolation", *C. R. Acad. Sci. Paris Ser. A* **228**, 1996–1998.

[38] H. Rademacher and I. J. Schoenberg (1950), "Convex domains and Chebychev's approximation problem", *Canad. J. Math.* **2**, 245–256.

[39] I. J. Schoenberg (1950), "On Pólya frequency functions. II. Variation–diminishing integral operators of the convolution type", *Acta Sci. Math. (Szeged)* **12**, 97–106.

[40] I. J. Schoenberg (1950), "The finite Fourier series and elementary geometry", *Amer. Math. Monthly* **57**, 390–404.

[41] M. Aissen, A. Edrei, A. M. Whitney, and I. J. Schoenberg (1951), "On the generating functions of totally positive sequences", *Proc. Nat. Acad. Sci.* **37**, 303–307.

[42] A. M. Whitney and I. J. Schoenberg (1951), "A theorem on polygons in n dimensions with applications to variation–diminishing and cyclic variation–diminishing linear transformations", *Compositio Math.* **9**, 141–160.

[43] I. J. Schoenberg (1951), "On Pólya frequency functions. I. The totally positive functions and their Laplace transforms", *J. Analyse Math.* **1**, 331–374.

[44] T. S. Motzkin and I. J. Schoenberg (1952), "On lineal entire functions of n complex variables", *Proc. Amer. Math. Soc.* **3**, 517–526.

[45] M. Aissen, A. M. Whitney, and I. J. Schoenberg (1952), "On the generating functions of totally positive sequences. I", *J. Analyse Math.* **2**, 93–103.

[46] I. J. Schoenberg (1952), "A remark on M. M. Day's characterization of inner–product spaces and a conjecture of L. M. Blumenthal", *Proc. Amer. Math. Soc.* **3**, 961–964.

[47] I. J. Schoenberg and A. Whitney (1953), "On Pólya frequency functions. III. The positivity of translation determinants with an application to the interpolation problem by spline curves", *Trans. Amer. Math. Soc.* **74**, 246–259.

[48] I. J. Schoenberg (1953), "On smoothing operations and their generating functions", *Bull. Amer. Math. Soc.* **59**, 199–230.

[49] I. J. Schoenberg (1953), "On a theorem of Kirzbraun and Valentine", *Amer. Math. Monthly* **60**, 620–622.

[50] T. S. Motzkin and I. J. Schoenberg (1954), "The relaxation method for linear inequalities", *Canad. J. Math.* **6**, 393–404.

[51] I. J. Schoenberg (1954), "An isoperimetric inequality for closed curves in even–dimensional Euclidean spaces", *Acta Math.* **91**, 143–164.

[52] I. J. Schoenberg (1955), "A note on multiply positive sequences and the Descartes rule of signs", *Rend. Circ. Mat. Palermo (2)* **4**, 123–131.

[53] I. J. Schoenberg (1955), "On the zeros of the generating functions of multiply positive sequences and functions", *Ann. Math.* **62**, 447–471.

[54] I. J. Schoenberg (1958), "Some extremal problems for positive definite sequences and related extremal convex conformal maps of the circle", *Kon. Ned. Akad. Amsterdam* **61**, 28–37.

[55] G. Pólya and I. J. Schoenberg (1958), "Remarks on de la Vallée Poussin means and convex conformal maps of the circle", *Pacific J. Math.* **8**, 295–334.

[56] I. J. Schoenberg (1958), "Spline functions, convex curves and mechanical quadratures", *Bull. Amer. Math. Soc.* **64**, 352–357.

[57] I. J. Schoenberg (1959), "On variation diminishing approximation methods", in *On Numerical Approximation* (R. E. Langer, ed), U. Wis. Press (Madison), 249–274.

[58] I. J. Schoenberg (1959), "The integrability of certain functions and related summability methods", *AMMo* **66**, 361–375 and 562–563.

[59] I. J. Schoenberg (1959), "On the maxima of certain Hankel determinants and the zeros of the classical orthogonal polynomials", *Kon. Ned. Akad. Amsterdam* **21**, 282–290.

[60] B. Epstein and I. J. Schoenberg (1959), "On a conjecture concerning schlicht functions", *Bull. Amer. Math. Soc.* **65**, 273–275.

[61] A. S. Besicovitch and I. J. Schoenberg (1959), "Sur les arcs ascendants à pente partout nulle et des problémes qui s'y rattachent", *C. R. Acad. Sci. Paris* **249**, 1079–1080.

[62] I. J. Schoenberg (1960), "On the question of unicity in the theory of best approximation", *Ann. New York Acad. Sci.* **86**, 682–692.

[63] J. C. Mairhuber, R. E. Williamson, and I.J. Schoenberg (1959), "On variation diminishing transformations on the circle", *Rend. Circ. Mat. Palermo (2)* **8**, 241–270.

[64] G. Szegö and I. J. Schoenberg (1960), "An extremum problem for polynomials", *Compositio Math.* **14**, 260–268.

[—] I. J. Schoenberg (1960), "Solution to Problem 59-2, N-dimensional Volume", *SIAM Rev.* **2(1)**, 43–45.

[65] C. T. Yang and I. J. Schoenberg (1961), "On the unicity of solutions of problems of best approximation", *Ann. Mat. Pura Appl. (4)* **54**, 1–12.

[66] A. S. Besicovitch and I. J. Schoenberg (1961), "On Jordan arcs and Lipschitz classes of functions defined on them", *Acta Math.* **106**, 113–136.

[67] I. J. Schoenberg (1962), "On two theorems of P. Erdös and A. Renyi", *Illinois J. Math.* **6**, 53–58.

[68] I. J. Schoenberg (1962), "On two theorems of Archimedes and F. J. van den Berg", *Simon Stevin* **5**, 133–138.

[69] I. J. Schoenberg (1962), "Extrema for gap power series of positive real part", *Proc. Nat. Acad. Sci.* **48**, 1151–1154.

[70] I. J. Schoenberg (1962), "On the Besicovitch–Perron solution of the Kakeya problem", in *Studies in Mathematical Analysis and Related Topics, Pólya volume* (xxx, ed), Stanford Univ. Press (Stanford CA), 359–363.

[71] I. J. Schoenberg (1962), "On certain minima related to the Besicovitch–Kakeya problem", *Mathematica (Cluj)* **4**, 145–148.

[72] I. J. Schoenberg (1964), "Spline interpolation and best quadrature formulae", *Bull. Amer. Math. Soc.* **70**, 143–148.

[73] I. J. Schoenberg (1964), "Spline interpolation and the higher derivatives", *Proc. Nat. Acad. Sci.* **51**, 24–28.

[74] Ch. Pisot and I. J. Schoenberg (1964), "Arithmetic problems concerning Cauchy's functional equation. I", *Illinois J. Math.* **8**, 40–56.

[75] I. J. Schoenberg (1964), "On best approximations of linear operators", *Indag. Math.* **26**, 155–163.

[76] I. J. Schoenberg (1964), "Spline functions and the problem of graduation", *Proc. Amer. Math. Soc.* **52**, 947–950.

[77] I. J. Schoenberg (1964), "On trigonometric spline interpolation", *J. Math. Mech.* **13(5)**, 795–825.

[78] I. J. Schoenberg (1964), "A note on the cyclotomic polynomial", *Mathématika* **11**, 131–136.
