

Additional data for Section 3 of “*Streamlining Inter-operation memory Communication via Data Dependence Prediction*”, Andreas Moshovos and Gurindar S. Sohi, in Proc. MICRO-30.

SPECint'95

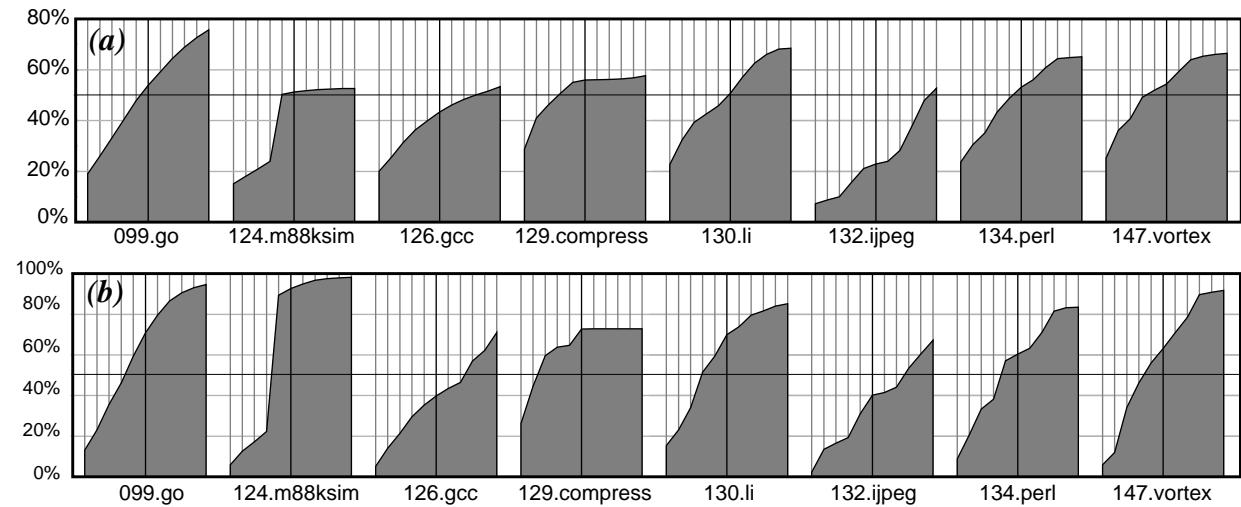

Figure 1. (a) distribution of true dependence store distances (b) distribution of output dependence store distances.
Range is 8 to 8K, samples are taken at powers of 2.

SPECfp'95

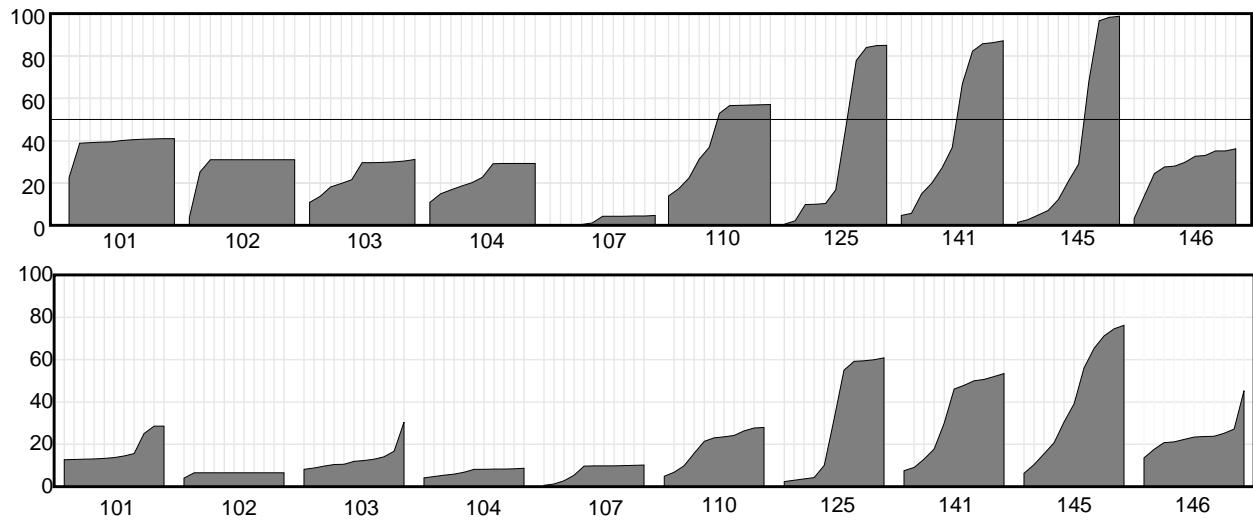

Figure 2. (a) distribution of true dependence store distances (b) distribution of output dependence store distances.
Range is 8 to 8K, samples are taken at powers of 2
